

I.	Cigar Box Fiddles: General Introduction.....	6
A.	Cigar Boxes Fiddles	6
B.	Well-Made Cigar Box Fiddles are a Big Hit at Fiddlers’ Conventions.....	6
II.	Brief History of Cigar Box Fiddles.....	8
A.	The Influences that Converged to Make the Cigar Box Fiddle Popular with Soldiers	8
1.	The Prevalence of Irish Immigrants in the Conflict.....	8
2.	The Introduction of the Spanish Cedar Cigar Box.....	8
B.	“Old School” Cigar Box Fiddles and Modern Civil War Re-Enactors	9
1.	Historical Accuracy Really Important to Re-Enactors	9
2.	Other Important Historical Accuracy Issues among Re-Enactors	9
a)	The types of tuning pegs and mechanisms used	9
b)	Pasted on Artwork.....	9
C.	“Modern” Cigar Box Fiddles	9
III.	Gallery of Cigar Box Fiddles	10
A.	Cigar Box Fiddles by Don Rickert Design	10
B.	Cigar Box Guitars, Mandolins and Fiddles by Other Makers	14
IV.	Cigar Box Fiddle Construction: Introduction	16
A.	Key Criteria.....	16
1.	These Criteria are Difficult to Meet.....	16
V.	Design Challenges and Solutions.....	17
A.	The key challenges that apply to both types are:	17
1.	Poor Structural Integrity	17
2.	Finding a Box with the Right Dimensions.....	17
B.	Challenges Specific to Modern Cigar Box Fiddles.....	17
C.	Challenges Specific to Antique (Civil War Era) Cigar Box Fiddles	17
1.	Making an Antique Style Cigar Box Fiddle that Fits into a Regular Fiddle Case 17	
VI.	Making a Great Modern Cigar Box Fiddle	18
A.	Side Note about “Cedar”.....	21
B.	Environmental Ethics Concerns:.....	21
VII.	The Steps to Making the Don Thomas Robusto Box Fiddle	23
A.	Summary of the Steps	23
B.	The Step-by-Step Details for Making the Don Tomas Robusto Box Fiddle	24
1.	Deciding on whether you are going to transfer the pasted-on artwork from the original box to the new soundboard.....	24
2.	Removing the top of the box (how this is done depends on your decision about transferring the pasted-on artwork).....	24
a)	If you are going to transfer the artwork from the original box to the fiddle.....	24
b)	If you are going to leave the cedar top exposed.....	27
3.	Removing the tax stamp from the original box	28
4.	Removing the artwork from the original box top (only possible with a drum sander on newer boxes).....	28
VIII.	Making the Don Tomas Robusto Box Fiddle Continued: Internal Structural Integrity.....	31
A.	Making and assembling the internal structural parts you will need.....	31

B.	Installing the structural parts in the front (neck end) of the box (the tail end parts are installed later).....	34
IX.	Making the Don Tomas Robusto Box Fiddle Continued: Making the New Top .	36
A.	Cutting the Western Red Cedar to the Correct Shape.....	36
B.	Cutting the Western Red Cedar to the Correct Shape.....	37
C.	Pasting the top label onto the new cedar top (optional).....	39
D.	Designing and cutting the sound holes	40
E.	Making a bass bar	42
1.	Some essential points about bass bars	42
F.	Gluing in the bass bar	44
X.	The Don Tomas Robusto Box Fiddle: Making a Custom Long Neck.....	45
A.	Why you need a lengthened neck	45
B.	Making a long neck.....	47
C.	The steps for making a long neck by grafting.....	48
1.	Executing the Graft.....	48
a)	Shaping the ends of the neck blank and the grafting block	49
b)	Drilling the hole for screwing the neck to the grafting block.....	50
c)	Finish with a long 3/16” bit and a hand-held drill.	51
d)	Drill a 3/8” countersink hole.....	52
e)	Drilling a pilot hole into the neck where it meets the grafting block	53
f)	An important note about the fingerboard.....	56
D.	Carving the Neck	56
1.	Tracing the fingerboard outline onto the extended neck	56
2.	Sawing the basic shape of the neck heel.....	58
3.	Carve the neck heel.....	60
4.	The final result	61
XI.	Setting the Neck.....	63
A.	Preparation	63
B.	The Setting Process.....	65
1.	Determine the neck height and angle.....	65
2.	Trim the base of the neck heel	65
3.	Ensure that the neck is centered.....	65
4.	Enlarge the neck screw hole	66
5.	Mark the pilot hole location on the neck	67
6.	Test screwing	69
C.	Attaching the Neck	70
D.	Checking neck set after attachment	72
XII.	Making the Don Thomas Robusto Box Fiddle: Finishing Up.....	74
A.	Preparations for Installing the Saddle	74
B.	Installing the Remainder of the Internal Structural Components	78
C.	Gluing the Top, Saddle, Fingerboard and Nut.....	83
1.	Attaching the top and the saddle to the box.....	84
2.	Gluing on the fingerboard and nut.....	86
D.	Fit and Finish of the Fingerboard, Nut and Box.....	88
E.	Dealing with Fit and Finish Issues.....	91
1.	Scratching of the binding tape	91

2.	Glue squeeze-out.....	92
3.	Trimming the nut and fingerboard.....	93
F.	Installing the end pin.....	94
G.	Installing the Tuning Pegs	95
1.	Tapering the pegs.....	95
2.	Drilling and reaming the holes in the peg box	98
a)	Marking the peg hole locations.....	98
b)	Drilling the pilot holes and starter holes	99
c)	Reaming the peg holes	101
d)	Final fitting and preparation of the pegs.....	102
e)	Trimming and doming the pegs	103
XIII.	Setup	105
A.	Preparation	105
1.	Shaping the Nut.....	105
2.	Grooving the Nut	106
3.	The Bridge	108
4.	The Tailpiece	108
5.	Making the Sound Post.....	111
6.	Installing the sound post	112
B.	The Actual Setup.....	116
1.	Stringing.....	116
2.	Grooving and Adjusting the Bridge.....	118
3.	Adjusting the Sound Post.....	119
4.	Adjusting the Nut Grooves	119
XIV.	The Completed Instrument	120
XV.	How to Make a Great Reproduction of an Antique (Civil War Era) Cigar Box Fiddle 121	
A.	Introduction.....	121
B.	The finished instrument, if made correctly, will be extremely loud and powerful. Some of its key features:.....	121
C.	I also go through the various neck and tuner options, including... ..	122
D.	How to Make a “Whiskey Bottle Box” Pochette.....	122
XVI.	Making the Antique-Style Cigar Box Fiddle	123
A.	Construction Drawings	123
1.	The parts.....	123
a)	The back.....	123
b)	The sides	123
c)	The end pieces, one for the front and one for the back.....	124
d)	The top	125
e)	The neck and end blocks.....	125
f)	The bass bar	126
g)	Neck and Fingerboard.....	126
h)	Other Small Parts	128
B.	Assembling the Antique-Style Cigar Box Fiddle Body.....	129
1.	What to do if you do not have equipment for cutting box joints	133
2.	Step 2: Level the top and back of the box.....	134

3.	Step 3: Glue and clamp the back to the box.....	134
4.	Step 4: Glue in the neck block, the end block and the ½” dowel	135
C.	Setting and Attaching the Neck	136
D.	Fit and Finish	139
E.	Installing the Tuning Pegs	139
XVII.	Setup	140
A.	Preparation	140
B.	The Actual Setup.....	140
XVIII.	The Finished Antique-Style Cigar Box Fiddle	141
A.	The etching.....	144
B.	The cutout	144
C.	The tuning pegs.....	144
XIX.	The Whiskey Bottle Box Fiddle	145
A.	Photos of a Completed Whiskey Bottle Box Fiddle	147
